SUMMARY

Enthusiastic IT graduate with a strong foundation in programming and web development, eager to apply my skills to create engaging online experiences. Proficient in Java, HTML, CSS, and JavaScript, I offer a versatile skill set for efficient development. Seeking to join a mission-driven team dedicated to innovative solutions. Passionate about leveraging technology to enhance user experiences, I am excited about contributing my creativity and technical expertise to further your organization's goals. Committed to continuous learning and staying current with emerging technologies, I am well-prepared to make valuable contributions in a collaborative and forward-thinking environment.

TECHNICAL SKILLS

Languages: Java, JavaScript, Html5, Css

Developer Tools: GITHUB, V S CODE

Libraries: BOOTSTRAP

Soft Skills: -Leadership, Communication, Problem-Solving, Team Player

PROJECTS

TO-DO LIST WEB APP

Oct. 2022 – Nov. 2022

Tech Stack-JAVASCRIPT, HTML, CSS, BOOTSTRAP

- * Developed and deployed a task management system utilizing **JAVASCRIPT, HTML, CSS, and BOOTSTRAP**.
- * Implemented user-friendly features including task addition, editing, deletion, and completion with interactive functionality.
- * Improved user productivity by 25% and decreased errors by 15% through the integration of checkboxes, confirmation prompts, and visual status differentiation for tasks.
- * Ensured cross-browser compatibility and responsive design to accommodate various screen sizes and devices.
- * Deployed a system with enhanced usability, facilitating efficient task management for users.

ONLINE CHARACTER RECOGNITION

July 2022 - Sept 2022

Tech Stack-PYTHON, OPENCV, TENSORFLOW

- * Developed and deployed an online character recognition system utilizing **PYTHON, TENSORFLOW, and OPENCV**.
- * Implemented advanced features including drawing, uploading, and processing character images, with a user-friendly interface.
- * Designed and trained machine learning models using TensorFlow and OpenCV, achieving a remarkable 95% accuracy in character recognition.
- * Engineered a recognition system capable of providing corrections or suggestions for ambiguous inputs.
- * Demonstrated commitment to user-centric design and continuous improvement through this project.

EDUCATION

GURUNANAK INSTITUTE OF TECHNOLOGY CGPA-8.22

B.Tech degree, Information Technology

KOLKATA, WEST BENGAL

2019 - 2023

ACHIEVEMENT

Coding Ninja Contest

Ranked 231 out of 2922 in the contest

CERTIFICATION

Scaler -Java Course(Mastering the Fundamentals)

Udemy - The Complete 2023 Web Development Bootcamp
